

Bryan Farrens, Eaton Corporation 2005-Present

Bryan Farrens is a Senior Manager of Government Programs Business Development for Eaton Corporation with responsibility for leveraging government and industry partnerships to create business growth and advance strategic technology initiatives. Bryan's work with military research labs, federal laboratories, universities, the Departments of Defense and Energy and industry have developed new capabilities in a wide range of technical areas including materials, additive manufacturing, electrical systems, cybersecurity, aerospace, and automotive/truck components.

Prior to joining Eaton, Bryan was a Naval Nuclear Power Submarine Officer. Bryan served on the USS Narwhal as department head with responsibilities for communications, electrical/navigation systems, propulsion systems and chemical controls. He developed and carried out joint military exercises with multiple foreign navies and United States battlegroups. Bryan also worked for BAE Systems where he managed advanced technology assessment efforts for the Army's next generation of ground combat vehicles
