

# MATTED GEOPHONE ARRAY CAPABILITY ASSESSMENT

01 February 2022

ERDCWERX, in collaboration with the U.S. Army Engineer Research and Development Center (ERDC), conducted a Capability Assessment to understand industry's ability to provide or design a matted geophone array that is self-contained into a fixed, mat-like arrangement using commercial off-the-shelf (COTS) instrumentation that meets or exceeds specific requirements identified by ERDC. Information received will inform the acquisition strategy necessary to meet project goals.

## Event Outcomes

- ERDCWERX received 3 submissions.
- Submissions were forwarded to the ERDC's Geotechnical and Structures Laboratory (GSL) for review and downselect.
