

RAPID OBSTACLE MARKING & PERIMETER FENCING CAPABILITY ASSESSMENT

1-3 September 2020

ERDCWERX, in collaboration with the U.S. Army Engineer Research and Development Center (ERDC) and Maneuver Support Center of Excellence (MSCoE) at U.S. Army Fort Leonard Wood, conducted a Rapid Obstacle Marking & Perimeter Fencing Capability Assessment to identify rapidly employed, next generation fencing and physical marking systems for the U.S. Army. On September 1-3, 2020, select companies delivered complete and functioning systems for operational demonstration.

Event Outcomes

- Out of nine industry submissions, the ERDC and MSCoE selected seven companies to participate in a virtual pitch in June to brief their solutions and receive specific questions from the Government panel.
- Three top candidates, downselected by the ERDC and MSCoE, participated in an operational demonstration at U.S. Army Fort Leonard Wood in September.
