

FAQs – Additive Construction: Solutions in DOD Path to Adoption

Last updated October 13, 2023

Would this topic include technologies that can validate the real-time integrity of 3D printed structures? We help monitor structural performance of nascent / alternative building materials and methods using industry standards via small form factor sensors. Is this aligned with the topic?

The intent is for presentations from companies able to provide printed structures for occupancy. Unfortunately, time will not allow for supplemental technology presentations.
